

MATH 245: Discrete Mathematics
Spring 2022 Section 2: MWF 10-10:50am
in-person lecture modality Meeting room: SSW-1500
Vadim's zoom link (to be used until Feb. 4): <https://sdsu.zoom.us/j/2865540514>

Overview:

This course is a rigorous introduction to many of the tools useful in higher mathematics and computer science. The major topics to be covered will be logic and proof techniques. Also included will be a brief introduction to set theory, number theory, relations, functions, recurrences, and complexity.

This course is required for all students pursuing majors in computer science, computer engineering, mathematics, and statistics.

Prerequisites:

Students must meet *all* of these requirements to take the course. Students should read this list carefully, and if they do not or cannot meet a requirement they should strongly consider taking the course later. Failure to meet even one of these requirements will likely lead to failure in the course.

1. Attitude Prerequisite: This course is difficult, with a 40% fail rate typically. Students must take the course seriously. Taking a break, even for a few days, will make it almost impossible to recover. Don't be a statistic, keep up with the course. In case of problems, seek help immediately – do not wait until the course is almost over, it will be too late.
2. Time Prerequisite: Students must spend 10-20 hours per week on this course, every single week from the first to the last. This includes 3 hours of lecture, 1 hour of group meetings, 1 hour of office hours, and 5-15 hours of solving and writing up homework exercises. Most of your learning will happen through solving exercises.
3. Technology Prerequisite: Students must have suitable technology for taking brief quizzes, in Canvas, at the conclusion of every class meeting. This can be a suitable cell phone, or a laptop connected to the campus wifi.
4. Attendance Prerequisite: This course meets in person¹ during its regularly scheduled times. Attendance is mandatory, and students must give their full attention to the course meetings for the duration.
5. Subject Prerequisite: This course has as prerequisite a grade of C or better in Math 124 or 150 or 151; or a 4 or better on the Calculus AB exam; or a 3 or better on the Calculus BC exam. Students barely meeting the prerequisite (i.e. a grade of C/C+/B-) are at substantial risk of failing this course, and will likely need additional study time.
6. Homework Prerequisite: Students are expected to solve every exercise in the supplement “Big Book O’ Exercises.” This will take substantial time and effort. Students who do not (or cannot) spend the time and effort, will generally not succeed in the course.
7. Textbook Prerequisite: Students *must* have a copy of *Mathematical Maturity via Discrete Mathematics*, ISBN 0-486-83857-9, for the duration of the course². It is inexpensive and can be bought at the SDSU bookstore, on Amazon, or various other booksellers. Students *must* also have the “Big Book O’ Exercises” supplement, either in printed form (available at the SDSU bookstore) or in digital form (available free from the course Canvas page). Be sure to get the one with the blue cover, it is newer with various mistakes corrected.
8. Office Hours Prerequisite: Students must attend office hours at least once per week. These visits are used to check homework solutions, and to get help on difficult problems.
9. Integrity Prerequisite: Students must understand and comply with the academic integrity standards in this course, and ask questions about any unclear issues. Unfamiliarity with the rules does not constitute a valid excuse for violating them.
10. Literacy Prerequisite: Students are expected to read the syllabus in full, be familiar with its contents, and check in the syllabus first when faced with administrative questions.

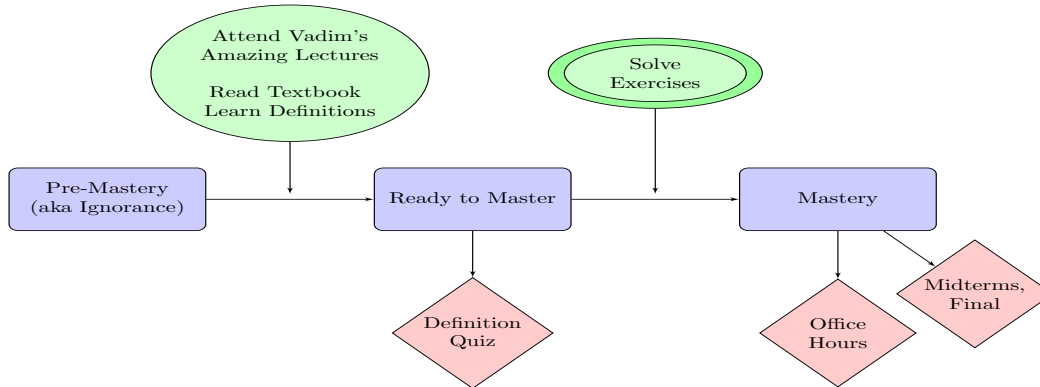

¹The course will be offered online Jan.19 - Feb.4, due to SDSU policy. No recordings of lectures are permitted. Afterward, the course will be entirely face-to-face, with in-person attendance mandatory. If you miss class, you will need to get the notes from a friend.

²Be sure to have the printed softcover Dover edition, not one of the old coursepacks of the same name.

Course Structure:

This course has in-person meetings³ three times per week, all of which students must attend. There are also office hours, held by the TA, which students must attend (at least) once per week. Class meetings will end with a definition quiz, on Canvas. Students will need to take these quizzes on their phones or laptops when in-person classes resume Feb. 7.

Students are expected to produce solutions to all homework exercises, and to bring these solutions to office hours. Students will also take three midterm exams (during classtime) and a final exam (during finals week).

Grading:

Midterm and final grades are all normalized to lie between 50% (blank but present) and 100% (perfect score). Missing grades are still worth 0%. Quiz grades are the usual 0% to 100% (random guessing gives 50% already, on average). The cutoffs for each letter grade are as below. No other grades are awarded. The passing grade for math/cs/ce majors is C.

What?	When?	Why?
Office Hours (check homework)	every week (14 × 10)	140
Definition Quizzes	every lecture (40 × 5)	200
Midterm 1 (Ch. 1-4)	Wed. Feb. 16	120
Midterm 2 (Ch. 5-7, except 7.3)	Wed. Mar. 9	120
NCAA holiday (wtf?)	Fri. Mar. 18	
Spring Break	Mon. Mar. 28 – Fri. Apr. 1	
Midterm 3 (Ch. 8-10)	Mon. Apr. 11	120
Catchup Day (last class day)	Wed. May 4	
[Midterm 4 (Ch. 11-13) + Final]	Fri. May 6 10:30-12:30	300
Total		1000

A: 900 B+: 880 B: 800 C+: 780 C: 700 D+: 680 D: 600 F: 0

Textbook:

Students are required to own and read the textbook, *Mathematical Maturity via Discrete Mathematics*, ISBN 0-486-83857-9 – it is inexpensive, very helpful, and brief. Students are expected to solve *all* of the problems⁴ in the supplement “Big Book O’ Exercises”. Hints can be found in the back of the supplement; solutions are not available, by design (see p. xxi of the textbook for an explanation).

Definition Quizzes:

On all class days except exam days, students take a 2 minute⁵ quiz in Canvas, typically on material from the previous section. These quizzes are true-false, giving either 5 points (for a correct answer) or 0 points (for an incorrect answer), or multiple choice. Students may use their textbook and notes if they wish, but may not ask for help from other people. Makeup quizzes are not given under any circumstances. Quizzes must be completed before 11:10am, at which time solutions will be released in Canvas. These solutions will be available for 24 hours.

³Zoom meetings until Feb. 4

⁴except section 7.3, which we will skip this semester

⁵occasionally 3 minute

Homework:

Students are expected to solve every exercise in the “Big Book O’ Exercises” supplement⁶. They are encouraged to seek help from office hours, their study group, and the SDSU Math and Stats Learning Center. If all else fails, the math department keeps a list of paid tutors. Students are strongly *discouraged* from seeking help from other online sources. Finding a friendly video or website that shows you an “easier way”, you might not know whom to trust. In this situation, there are two simple questions you can ask, that will help: (a) Who’s got better credentials? (b) Who’s grading my exams?

Office Hours:

Students are required to sign up for one of the TA’s office hours, and attend them every week. The primary purpose is to check your homework solutions; it is also possible to ask about practice exam questions. Weeks end Wednesdays at midnight. The first week ends Jan.26. For full credit, students are expected to come prepared (with solved homework exercises), and stay for the entire one-hour period. Students may attend additional office hour sessions if they wish (with no additional credit) on a drop-in basis. It may be possible to change the designated office hour, temporarily or permanently, if circumstances arise – just ask.

Exams:

The three midterm exams and final will all be closed book, closed notes⁷, with no calculators or other technology permitted. The final exam will be roughly 120/300 on the last three chapters of material (like a fourth midterm) and roughly 180/300 cumulative (equally on all 13 chapters). All exam questions will be graded on a 50%-100% scale. No makeup exams will be offered under any circumstances. In case of a documented medical emergency, please contact the professor to discuss other options.

Re-grading:

All regrade requests must be submitted via email, to the professor, and are due within one week of when the exam/quiz was returned. Requests should include a compelling explanation of why more points should be awarded. Passionate desire for a higher grade is, sadly, not a compelling explanation.

Attendance:

Students are expected to attend every class, paying attention and taking notes the entire time. Students who miss class, even occasionally, are at substantial risk of failing the course. Makeup quizzes and exams are not given under any circumstances.

Students who will miss class due to a religious observance, or for an official university event or activity (such as athletics), must notify the instructor during the first two weeks of classes. Absences for official university events must be documented with a memorandum from the event’s sponsor with that same deadline. Students missing class due to a medical emergency must provide a signed medical excuse justifying the absence. Student Health Services does not provide these.

Contact:

Please contact the professor exclusively through his email, vponomarenko@sdsu.edu. Please do not use Canvas/Gradescope notifications, other email addresses, smoke signals, etc.

Collaboration and Academic Integrity:

Students are strongly encouraged to study together, and to work together on exercises. They are strongly encouraged to form study groups for this purpose. Best practice for group size is 4 people.

Collaboration on quizzes/exams is forbidden. Sharing of quiz questions or quiz access codes is forbidden, including after the quiz has concluded. Impersonation of a student for quiz/exam purposes is forbidden. Use of paper or online resources during quizzes and exams is forbidden, except where otherwise stated⁸. All violations will be reported to the Center for Student Rights and Responsibilities and will also result in grade reductions or worse. Courses failed due to integrity violations are ineligible for course forgiveness. See SDSU’s full policy⁹ on academic honesty, or ask the instructor, if you have any doubts or questions.

Violations of academic integrity are very serious. Don’t jeopardize your entire college career, and possibly your future job prospects, for a tiny benefit (whether for yourself or for a friend).

⁶except 7.3, which we will skip this semester

⁷one 3” × 5” index card of notes will be permitted for each midterm, and one 8.5” × 11” page of notes for the final

⁸For quizzes: the book, coursepack, and all notes are permitted, as well as Canvas (but no other websites). For exams: only paper notes in specified, limited, quantities are permitted.

⁹http://go.sdsu.edu/student_affairs/srr/cheating-plagiarism.aspx

Online Materials:

The professor maintains a comprehensive website (URL below). It contains old exams, solutions (most of which are correct), syllabi, course evaluations, grade distributions. Keep in mind that the textbook is fairly new; older courses were from an evolving coursepack. Their material may differ in places. The instructor is very diligent and prompt about responding to emails. You may expect a response within 24 hours, often much sooner. The course is also active on Canvas.

Additional Help:

The Math and Stats Learning Center¹⁰ offers free drop-in tutoring in this course (this is the same place where the TA holds his office hours). Although the MSLC is open for many hours each week, Math 245-certified tutors are available at only certain times. The math department¹¹ maintains a list of paid tutors. Academic advising is available at the Student Success Center¹². Counseling and Psychological Services¹³ helps students with mental health concerns. The SDSU Economic Crisis Response Team¹⁴ helps students with food/housing/financial concerns.

SASC:

If you are a student with a disability and believe you will need accommodations for this class, it is your responsibility to contact the Student Ability Success Center at (619) 594-6473. To avoid any delay in the receipt of your accommodations, you should contact SASC as soon as possible. Please note that accommodations are not retroactive, and that accommodations based upon disability cannot be provided until you have presented your instructor with an accommodation letter from SASC.

Learning Objectives:

Students will carefully state all definitions relevant to the course, apply these definitions to objects, and determine whether or not the definition applies. This determination will often involve a calculation. Students will have a ready supply of examples and non-examples to these definitions, and will be able to justify why these are examples or non-examples. Students will prove and disprove statements using the methods of discrete mathematics. They will construct rigorous proofs following the rules of logic. Students will carefully state and apply many mathematical theorems.

Miscellaneous:

Consider as included all of the standard SDSU boilerplate syllabus text found in:

https://ctl.sdsu.edu/_resources/files/syllabustemplate21-22revised.docx.

Professor:

Vadim Ponomarenko vponomarenko@sdsu.edu

Office hours: Mon/Wed/Fri 9-9:50am, and by appt., at: GMCS 511 (zoom room until Feb. 7)

Website: <http://vadim.sdsu.edu/> (all old materials may be found here, under “teaching”)

TA:

Joe McDonough jmcdonough@sdsu.edu

Office hours are held in the MSLC <https://mlc.sdsu.edu/> (virtual until Feb. 4, in person afterward)

This course is hard, no joke. Don't make it even harder by not giving yourself enough time to learn. Plan on spending 10-15 hours per week solving exercises.
