## Spring 2023 Math 245 Exam 1

Please read the following directions:

Please write legibly, with plenty of white space. Please **print** your name and REDID in the designated spaces above. Please fit your answers into the designated areas; material outside the designated areas (such as on this cover page) will not be graded. To get credit, you must also show adequate work to justify your answers. If unsure, show the work. Each of the ten problems is worth 5-10 points. The use of notes, books, calculators, or other materials on this exam is strictly prohibited, except you may bring one 3"x5" card (both sides) with your handwritten notes. This exam will begin at 10:00 and will end at 10:50; pace yourself accordingly. Good luck!

Special exam instructions for SSW-1500:

1. Please stow all bags/backpacks/boards at the front of the room. All contraband, except phones, must be stowed in your bag. All smartwatches and phones must be silent, non-vibrating, and either in your pocket or stowed in your bag.
2. Please remain quiet to ensure a good test environment for others.
3. Please keep your exam on your desk; do not lift it up for a better look.
4. If you have a question or need to use the restroom, please come to the front. Bring your exam.
5. If you are done and want to submit your exam and leave, please wait until one of the three designated exit times, listed below. Please do **NOT** leave at any other time. If you are sure you are done, just sit and wait until the next exit time, with this cover sheet visible.

Designated exam exit times:

10:20 "I need to work harder"

10:40 "I can't wait to get out of here"

10:50 "I need every second I can get"

---

REMINDER: Use complete sentences.

Problem 1. Carefully define the following terms:

a. odd

b. predicate

Problem 2. Carefully state the following theorems:

a. Division Algorithm Theorem

b. Conditional Interpretation Theorem

Problem 3. Without using truth tables, prove the following:

For all propositions  $p, q$ , we have  $(p \rightarrow q) \wedge (p \rightarrow \neg q) \equiv \neg p$ .

Problem 4. Use a truth table to help prove the following:  
For all propositions  $p, q$ , we have  $(p \rightarrow q) \wedge (p \rightarrow \neg q) \equiv \neg p$ .

Problem 5. Let  $a, b, c \in \mathbb{Z}$ . Suppose that  $a \leq b$  and  $0 \leq c$ . Prove that  $ac \leq bc$ .  
Note: do not just cite a theorem – you are being asked to prove that theorem.

Problem 6. For arbitrary  $n \in \mathbb{N}_0$ , calculate and simplify  $\frac{(n+2)!}{(n+4)!}$ .

Problem 7. Simplify the following expression as much as possible, where only basic propositions are negated. Be sure to justify every step.  $\neg(p \vee \neg(p \vee \neg(q \vee r)))$

Problem 8. Prove or disprove:  $\forall x \in \mathbb{Z}, |4x - 9| > 1$ .

Problem 9. Prove or disprove:  $\forall x \in \mathbb{Z}, x \leq 1 \rightarrow |4x - 9| > 1$ .

Problem 10. Prove or disprove:  $\forall x \in \mathbb{Z}, |4x - 9| > 1 \rightarrow x \leq 1$ .
