

**100 Years Ago This Month in The American Mathematical Monthly**  
**Edited by Vadim Ponomarenko**

The American Mathematical Monthly, official organ of The Mathematical Association of America, is the Only Journal of Collegiate Grade in The Mathematical Field in this Country. *This means that its mathematical contributions can be read and understood by those who have not specialized in mathematics beyond the Calculus.* The Historical Papers, which are numerous and of high grade, are based upon original research. The Questions and Discussions, which are timely and interesting, cover a wide variety of topics. The Book Reviews embrace the entire field of collegiate and secondary mathematics. The Curriculum Content in the collegiate field is carefully considered. Good papers in this line have appeared and are now in type awaiting their turn. The Notes and News cover a wide range of interest and information both in this country and in foreign countries. The Problems and Solutions hold the attention and activity of a large number of persons who are lovers of mathematics for its own sake. There are other journals suited to the Secondary field, and there are still others of technical scientific character in the University field: but the MONTHLY is the only journal of Collegiate grade in America suited to the needs of the non-specialist in mathematics.

Excerpted from back matter **24** (1917), unnumbered.
